

Zero Waste in Residential Campuses

The Example of Excellent PU College

Many believe that implementing Zero Waste is easier in private day institutions, where students come in the morning and leave by evening — but far more difficult in residential campuses. Excellent PU College, Moodbidri, stands as proof that this is not true.

With nearly 2,500 residential students and an additional 500 day scholars, the college accommodates around 3,000 students in total. Yet, it has successfully transformed itself into a Zero Waste Campus, setting a remarkable example for other residential institutions across Karnataka.

Under the visionary leadership of Chairman Shri Jain and Secretary, both passionate nature lovers, the institution has built a system where waste is managed responsibly from classrooms to hostels.

EXCELLENT

MOODUBIDIRE

Their consistent efforts and structured approach earned them official recognition and felicitation by the Moodbidri Town Municipal Council (TMC) in the year 2023.

Excellent PU College's journey proves that when the management leads with commitment and care for the environment, Zero Waste is not just possible — it becomes a culture, even in a fully residential campus.
